BOKSMART SERIES 1/11 CONCUSSIONS PAGE 2 OF 2

You don't need a handbook to identify a suspected concussion If you suspect one, take the player off, it's really that simple

THE GRADUATED RETURN TO SPORT (GRTS) PROTOCOL

EACH STAGE PROGRESSION AFTER THE STAND-DOWN PERIOD IS A MINIMUM OF 24 HOURS

| STAGE | REHABILITATION | OBJECTIVE | EXERCISE ALLOWED | |
|-------|---|---|---|--|
| 1 | Minimum age-appropriate rest period | RECOVERY | Complete body and brain rest for the first 24-48 hours Followed by rest and light exercise (walking, slow, stationary cycling) that does not worsen symptoms | |
| 2 | Light aerobic exercise (20 minutes) | INCREASE HEART RATE | Light jogging swimming or stationary cycling at low to moderate intensity No resistance training Symptom free during full 24-hour period | |
| 3 | Sport-specific exercise (25-30 minutes) | ADD MOVEMENT | Running drills No head impact activities | |
| 4 | Non-contact training drills | EXERCISE, COORDINATION AND COGNITIVE LOAD | Progression to more complex training drills, e.g. passing drills May start progressive resistance training Player MUST be medically cleared at the end of this Stage before going to Full-contact training or Stage 5 | |
| 5 | Full-contact practice | RESTORE CONFIDENCE AND ASSESS FUNCTIONAL SKILLS BY COACHING STAFF | Normal rugby training activities If player remains sign and symptom-free for the full 24 hours, they then move on to Stage 6 | |
| 6 | Return to match play/sport | RECOVER | Player rehabilitated and can be progressively re-introduced into full match play | |

NOTES:

- a player may only start the GRTS process once cleared by a medical doctor and all symptoms have disappeared
- a player may only progress to the next stage if no symptoms occur during or after exercise in each stage
- a player must again be cleared by medical doctor before starting full-contact training

AGE-APPROPRIATE STAND-DOWN & GRTS – EARLIEST RETURN TO SPORT

PLAYERS 18 AND YOUNGER: 2 weeks rest post injury + 4 days GRTS (Earliest return to rugby – Day 19 post injury) PLAYERS 19 AND OLDER: 1 week rest post injury + 4 day GRTS (Earliest return to rugby – Day 12 post injury)

| PLAYER AGE GROUP | COMPULSORY REST PERIOD POST CONCUSSION | CAUTION! | GRTS | CAUTION! | NUMBER OF MISSED FULL WEEKS |
|------------------------|--|--|--|--|---|
| 18 AND YOUNGER | Minimum of 2 WEEKS off before starting the GRTS process, even longer if any signs or symptoms remain | CAUTION! Return To Sport protocol should be started only if the player is symptom free and off medication that modifies symptoms | 4 Stage GRTS with progression every 24 hours if no symptoms. Total GRTS days = a minimum of 4 days | CAUTION! Contact Sport should be authorised only if the player is symptom free and off medication | Earliest Return To Sport = 2 weeks rest post injury + 4 days GRTS (Play – DAY 19 post injury) |
| 19 AND OLDER | Minimum of 1 WEEK off before starting the GRTS process, even longer if any signs or symptoms remain | | | | Earliest Return To Sport = 1 week rest post injury + 4 days GRTS (Play – DAY 12 post injury) |

CAUTION: Any player with a second concussion within 12 months, a history of multiple concussions, players with unusual presentations or prolonged recovery should be assessed and managed by health care providers (multidisciplinary) with experience in sports-related concussions. It is recommended that if this expertise is unavailable then as a minimum the player should be managed using the protocol from the lower age group.

EXAMPLE: 1. 'Players 19 and older' uses the 'Players 18 and younger' protocol and 2. for 'Players 18 and younger' the minimum rest period should be doubled.

However, the medical doctor clearance is non-negotiable and must always be provided before entering the GRTS and before starting full-contact training, regardless of who is available to manage or monitor the GRTS process.
